### **DETAILED ACTION**

Claims 55-77 are pending in the application.

#### ***Election/Restrictions***

This application contains claims directed to more than one species of the generic invention.

The species are as follows: those exhibited by the working examples 1-331 and claim 59.

Claims 55-58 and 60-77 are generic to a plurality of disclosed patentably distinct species comprising specific moieties of the variables A, D and G.

Applicant is required, in reply to this action, to elect a single species to which the claim shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a)

The species listed above are not relate in that the variable core created by varying definitions of A, D and G in the formula do not belong to a recognized class of chemical compounds in the art, and a reference anticipating one invention, would not

render obvious the other. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required.

The claims will be examined to the extent where those species that share a common core will be included with the species elected.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda L. Coleman whose telephone number is 571-272-0665. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O. Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
